

The Tidal River Water Custodian

The Challenge

Include the very diverse local communities in the Decision Support for water management in the South West Delta of Bangladesh

Improving livelihoods by handling the complex interaction between many diverse actors and the geo-physical environment. Engineering solutions combined with livelihood approaches.

Balancing Life-stories and Simulation models

The team

Myisha Ahmad, Willem van Deursen, Carthago Consultancy
Shahnour Hasan, IMACON Water
Jahin Shams, Uttaran, Bangladesh
Mahmuda Mutahara, Bridge of Community Development, Bangladesh
