5. Challenges, Lessons Learned and Way Forward

Challenges

A main challenge presented during the month of February was arranging field visits to project islands for survey purposes. As we are closing approaching the month of Ramadan, our team has to complete the initial visits to islands before Ramadan begins.

Lessons Learned

For the project to become a success, organizations have to collectively use the application. In order for this to happen, there needs to be engagement of stakeholders within the project itself. From the first visit to K. Dhiffushi, our team was able to meet with the council, WDC (Women’s Development Committee), Guesthouse owners, and community members. These members will all be involved in implementation of the project.

In addition, the community members of K. Dhiffushi suggested using flyers/information sheets regarding the project to disseminate to the public.

Way Forward

Engage and include stakeholders during project implementation. The next activities will include travel to HDh. Vaikaradhoo for the initial field visit.

Glossary

Project Title	means	Exact and full name of the project as defined in the Sub Grant Agreement
Project Code	means	A five-digit code assigned by ADPC
Partner Organization	means	The lead agency(ies) responsible for the implementation of the project
Key Achievements	means	The actual outcome or impact of your work, such as reaching a PDO, or outcome or output defined in the final and agreed Results Framework.
Implementation Progress	means	Implementation progress means the steps or actions taken to achieve the PDO or outcomes or outputs. In this case it would be the list of activities defined in the final and approved work plan
Challenges	means	The most significant and persistent areas of risk that affect the project's ability to achieve its objectives. Challenges could be related to managing the Sub Grant, sustaining development gains, coordinating with stakeholders, and implementing core management functions. Please also discuss the solutions to mitigate these risks.
Lessons Learned	means	Lessons learned are contextual or operational information that may affect planning and future performance. They highlight the insights gained from the activity's implementation practices and progress, such as staff feedback, stakeholder interviews, data analysis, and success stories. They also include any changes required by or support requested from ADPC or partners.
