

ADPC Webinar Series

iCARE - Innovation in Climate Adaptation and Resilience

Enhancing Infrastructure Resilience in Asia-Pacific

Webinar Overview

Join us for an engaging webinar focused on enhancing infrastructure resilience in the Asia-Pacific region. As critical infrastructure plays a pivotal role in economic growth and societal well-being, this event aims to explore innovative approaches and best practices. Our distinguished speakers will share insights, strategies, and success stories, providing valuable knowledge for practitioners, and stakeholders.

03 May 2024
14:00-15:00
(ICT)

Guest Speaker

Dr. Milad Zamanifar

is a scientific advisor and lecturer, holding a Ph.D. in complex civil systems from TU Berlin. He specializes in climate and disaster-resilient critical infrastructures, decision analysis, and sustainability with extensive work experience and relevant publications.
